Tyler Chandross-Cohen

Ph.D. Candidate at The Pennsylvania State University
113 Alma Mater Dr, Apt 303, State College PA, 16803
tfc5209@psu.edu | 732-421-9445 | ORCID: 0000-0003-4367-0293

Research Statement: I study the foodborne pathogen *Bacillus cereus*, focusing on how genetic diversity and environmental conditions influence virulence potential. My work aims to characterize the role of enterotoxins and cytotoxicity across diverse isolates to improve our understanding of pathogenic potential and inform food safety risk assessment and microbial control strategies.

Education and Training

Institution	*Degree*	*Year*	*Field of Study*	*GPA*	*Relevant Coursework*
The Pennsylvania State University	Ph.D.	TBD	Food Science	3.98	Applied Bioinformatics (852), Applied Statistics (500), Professional Skills for Graduate Students (503), Research Methods (501).
The Pennsylvania State University	B.S	2022	Food Science with a minor in Microbiology	3.68*	Food Microbiology (408), Food Microbiology Lab (409), Communicating Research in Agricultural Sciences (422), Food Engineering (405), Food Law (497), Medical Microbiology (412), Microbial Genomic Epidemiology (517).

* Dean's List: Fall 2019, Spring 2020, Fall 2020, Spring 2021, Fall 2021, Spring 2022

Research Experience

Experience	*Year*

The Pennsylvania State University Food Science Department *Aug 2022 – Present*

Graduate Research Assistant

- Conducting doctoral research on the foodborne pathogen *Bacillus cereus*, with a focus on psychrotolerant isolates gene knockouts.
- Performing growth experiments in skim milk broth under multiple temperature conditions to build exposure assessment model.
- Evaluating cytotoxicity of *B. cereus* isolates using a human intestinal epithelial cell model to study better understand virulence potential.
- Responsible for training and mentoring undergraduate researchers, overseeing media preparation, and authoring detailed laboratory protocols, standard operating procedures, and experimental proposals.

The Pennsylvania State University Food Science Department *Jan 2021 – May 2022*

Undergraduate Research Associate

- Collaborated with a graduate researcher to detect and quantify *Listeria monocytogenes* from environmental samples collected in ice cream manufacturing facilities.
- Conducted isolation and characterization of protective cultures and evaluated their inhibitory effects against *L. monocytogenes* using microbiological and analytical methods.

The Pennsylvania State University Food Science Department *Oct 2018 – May 2022*

Undergraduate Research Assistant

- Laboratory of Dr. Molly Kelly conducting undergraduate research.

- Experimental studies to assess the impact of the Spotted Lanternfly on wine quality and safety.
- Analysis of yeast strain aroma, flavor experimentation, and miscellaneous extension research
- Responsibilities include daily monitoring of wine production, including thorough sampling, chemical testing, and data collection and analysis.

The Pennsylvania State University Plant Science Department *Sept 2019 – Mar 2020*

Undergraduate Research Assistant

- Laboratory of Dr. Michela Centinari assisting with research projects.
- Experiments to assess the impact of methods to delay budburst in grapevines on wine chemistry.
- Responsibilities included berry sampling, grape juice chemistry, carbohydrate analysis, data entry, grape processing, and monitoring the fermentation of wine.

Teaching Experience

Experience	*Semester*
The Pennsylvania State University Food Science Department *Instructor on Record* • Taught two laboratory sections per day, twice weekly (Tuesdays and Thursdays), providing instruction to undergraduate students on microbiological methods in food safety and quality. • Delivered pre-lab lectures and guided students through exercises involving isolation, enumeration, and identification of foodborne pathogens and spoilage microorganisms. • Implemented and maintained pre-established course curriculum, protocols, and assessments. • Supervised and mentored students in aseptic technique, serial dilutions, plate counting, enrichment and selective culturing, and biochemical characterization. • Managed biosafety and laboratory operations, ensuring compliance with BSL-2 practices and appropriate waste handling. • Evaluated student progress through lab reports, quizzes, and practical exams.	*Fall 2025*
The Pennsylvania State University Food Science Department *Short Course Graduate Teaching Assistant* • Teaching Assistant for the Ice Cream Short Course. • Assisted in laboratory in ice cream freezing, mix calculation and vanilla flavor. • Assisted in homework help sessions to ensure the success of the students.	*Spring 2023, Spring 2024, Spring 2025*
The Pennsylvania State University Food Science Department *Graduate Teaching Assistant* • Graduate Teaching Assistant for Food Microbiology Laboratory (FDSC 409). • Present in class to assist in class discussions and troubleshooting students experiments. • Hosted weekly office hours to guide students and answer their questions. • Graded laboratory reports, results sheets, and exams.	*Fall 2023, Fall 2024*
The Pennsylvania State University Chemistry Department *Learning Assistant and Grader* • Hosted two weekly LA sessions to review problem sets with students. • Supported outside-of-classing learning and gave extra help to students. • Graded midterm and final exams	*Fall 2020, Spring 2021, Fall 2021, and Spring 2022*
The Pennsylvania State University Food Science Department *Undergraduate Teaching Assistant* • Undergraduate Teaching Assistant for Food Microbiology (FDSC 408). • Present in class to answer questions and was involved in class discussions. • Hosted weekly office hours to answer student's questions and support their learning. Reviewed and proctored exams.	*Fall 2021*

Mentorship Experience

Student	*Year*
Lydia Weidner	*Nov 2024 – Current*
Kailee Shotto	*Aug 2023 – May 2024*
Elizabeth Henry	*Aug 2023 – Jan 2024*
Erin Readinger	*Jan 2023 – May 2024*
Mackenna Yount	*Aug 2022 – May 2024*
Express Mentorship Group at Rutgers Preparatory School	*Aug 2021 – Current*

*Undergraduate Student at Penn State

Leadership Experience

Role	*Date*
President of the Penn State Chapter of Phi Tau Sigma	*Apr 2023 – Current*
Kovac Lab Safety Coordinator	*Jan 2023 – Current*
Treasurer of the IAFP Student Professional Development Group	*May 2023 – July 2025*
Treasurer of the Penn State Chapter of Phi Tau Sigma	*May 2022 – Apr 2023*

Cytotoxicity, Transcription, and Stability of Virulence Factors Produced by Psychrotolerant *Bacillus cereus* Group Isolates. 2025 International Association for Food Protection Annual Meeting. July 28-30, 2025, Cleveland, Ohio.
Contributions: Development of methods, conducted experiments, conducted data analysis, and **presented**.

Awards and Honors

Award/Honor	*Year*	*Funding Source*
Gamma Sigma Delta Symposium First Place Winner Graduate Division	*2025*	*
Dr. Daryl B. & Mrs. Dawn L. Lund Student International Travel Scholarship of Phi Tau Sigma	*2025*	◊
Recipient of the WH Pierce Prize for Global Impact in Microbiology, One Health Microbiome Center, Presented by Applied Microbiology International.	*2024*	*
John H Hetrick Food Science Scholarship	*2024*	*
International Association for Food Protection Student Travel Award	*2024*	◊
Allegheny Branch, American Society of Microbiology Meeting Second Place Winner Graduate Division Poster presentation	*2023*	◊
Dudek Graduate Scholarship in Food Science	*2023*	*
Internal Agricultural Sciences Scholarship	*2023*	*
Food Industry Group Graduate Student Leadership Award	*2023*	*
Gamma Sigma Delta Symposium First Place Winner Graduate Division	*2023*	*
Internal Agricultural Sciences Scholarship	*2023*	*
PNC Financial Corporation Graduate Fellowship	*2023*	*
Robert Graham Endowment Graduate Fellowship	*2022*	*
Keeney Food Science Department Head Fund	*2022*	*
University Graduate Fellowship	*2022*	*
E&W Rosskam Scholarship in Food Science	*2022*	*
Henry Pierce in Ag Science Scholarship	*2022*	*
